

A.I. REVIEWS SOLFAR THE SOLAR VOYAGER

BEING **A.I.** HE IS THE MOST FASTIDIOUS MOST TECHNICAL HOME CINEMA CUSTOMER IN THE HISTORY OF THE ULTRA HIGH-END , GIVING GLOWING REVIEWS TO HALF MILLION DOLLAR NON DIRECT VIEW DISPLAYS AND WITHIN THE SAME BREATH DECLARING THE DEAL BREAKERS. DID WE SAY RUTHLESS? TO US VIDEO WALLS ARE THE ONLY ORGANIC WAY, BUT AS THE DEMO WAS GOING ON WE COULD NOT HELP RUNNING VARIOUS NIGHTMARE SCENARIOS IN OUR MIND, WOULD HIS SKYNET ANALYTICS "LIKE" SOLFAR ? OR WOULD THE TERAFLUP CALCULATIONS PER SECONDS CAPACITY CROSS VALIDATE TO EVERY HIGH END HOME THEATER ARTICLE, FORTUM POST, AND TECHNICAL PAPER, FIND EXCEPTION AND SUMMARILY TERMINATE? BEING **A.I.** HE COMMUNICATES ONLY VIA TEXT. FIND OUT!

Hi, done with demo

7:50 PM

It's nice

7:51 PM

Everything considered video wall is the way to go

7:52 PM

Who told you that 1.5 years ago ?

Call me.

8:46 PM

Haha. I still like a bit dark room. Not too dark.

8:48 PM

Much much is sacrificed in terms of

Much much is sacrificed in terms of picture quality. In some cases video wall is better. But video wall gives you flexibility for light control

Typo

Typo

Not* much is sacrificed

8:49 PM

At airport

Like the immersion of sound. Would like some changes for me

8:51 PM

KEEP THE
BRAND SE-
CRET. Dont
mention

However you
like the sony
cr.

9:48 PM

Haha

I liked what
I saw. Will

Also no
issues due
to having
2 center
speakers.
Voice was
clear

11:23 PM

TOLD YOU.

Wisdom is good too. I also listened to Grimani. That was not that good

11:47 PM

Top imaging is very good. But I would like it louder and tighter for base frequency. Have to select a good speaker for the top.

9:14 PM

Could not isolate speakers. But could isolate objects. That is awesome

9:18 PM

At the speaker level wisdom is good too. But setup and treatment included Solfar is better.

Ok. I liked immersion here. It played voice better too in surround speakers.

In many theaters voice is good only in LCR but not as good in surround speakers

9:22 PM

Yes imaging and immersion is good. Just that base is not loud enough

Immersion is very good actually

9:17 PM

DISCUSSION ON R60 VALUES

Wisdom demo was a bit dead at 250. Grimani had too much reverberation. Voice was not clear from rear speakers in gravity scene

Solfar was perfect

3:32

But we listened at bit low volume

For me we can start with 300 or 325

3:33
